### Children's Program – LEARN Online

The Children's Program has helped more than 100,000 families since 1987. Recommendations from these families, as well as schools and physicians, are our most frequent source of referrals. LEARN Programs expand our offerings so we can share knowledge with parents online.

We want your feedback to make the program better! If you have comments, suggestions, questions or concerns about PATA or its content, please email: [learn@childrensprogram.com](mailto:learn@childrensprogram.com)
